DETAILED ACTION

The request filed on 3/14/2002 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/299388 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Objections

Claim 24 is missing. Appropriate correction is requested.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,3-9,14-23,25-30,32-37,48,49,51-57,59,60,62-67, 69-71 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that the claims fail to correspond in scope with that which applicant(s) regard as the invention can be found in Paper No. 18 filed 2/10/2002. In that paper, applicant has stated "In Applicants' claimed invention, the particles have essentially zero velocity relative to the gas that carries them, and no momentum towards the target substrate. Thus, these particles will not deposit unless they are motivated to do so by another force, which in the case of Applicant's claimed invention is the electric field imposed by the deposition zone". (Amendment (2/10/2002), pg. 13), and this statement indicates that the invention is different from what is defined in the claim(s) because the claims do not appear to indicate that the particles have zero velocity relative to the gas and that the electric field is the sole method by which the particles are deposited on the substrate.

Art Unit: 1616

Claims 32-34 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 32,33 recite the limitation "ion emitter". There is insufficient antecedent basis for this limitation in the claim. Claim 3 does not appear to recite "ion emitter".

Claim 34 is dependent on claim 12 which is cancelled.

Claims 48, 52-57, 60, 62-67, 69-71 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted element is: "dielectric substrate". The Specification appears to indicate that the substrate is dielectric. As such, the claims should indicate the same.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,5,7,22,23,25,26,28,29,31-33,35-37,48,57,59-63,67,69-71 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 98/42446.

Art Unit: 1616

WO 98/42446 expressly discloses a method of depositing charged nanodrops on to a substrate using a alternating electrical current falling within the scope of applicant's claims (See Figures and Claims).

Alternatively, at the very least the claimed invention is rendered obvious within the meaning of 35 USC 103, because the prior art discloses products and uses that contain the same exact ingredients/components as that of the claimed invention. See *In re May*, 197 USPQ 601, 607 (CCPA 1978). See also *Ex parte Novitski*, 26 USPQ2d 1389, 1390-91 (Bd Pat. App. & Inter. 1993).

Examiner has duly considered Applicants' arguments but deems them unpersuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., zero velocity of particles relative to gas, electric field as sole source of momentum which drives the particles onto substrate) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
